"UnitronGroup is an international group of companies, offering state-of-the-art headend Digital Signal Processing technologies and digital TV accessories. These technologies and products are ideal for TV distribution to multi-dwelling and residential buildings.

End users have access to the 'Johansson' branded products via a worldwide network of distributors and integrators.

In this fast moving market, innovation and flexibility are the main keywords. Therefore, UnitronGroup runs multiple factories and R&D centers in Belgium and the Czech Republic. Buying a Johansson product is buying a cutting-edge piece of electronics that will last for years!"

# Digital Modular Headends

- ▶ Johansson has developed a complete range of Digital Modular Headends (DMH), which are the ideal TV distribution system for middle-sized and large buildings (MDU). We offer a complete product range, consisting of COFDM (DVB-T) and QAM (DVB-C) modulators and IPTV streamers. All of these products are available with satellite (DVB-S/S2), terrestrial (DVB-T/T2), cable (DVB-C) or A/V inputs (SD & HD). Thanks to the modular design, the system is scalable to suit your specific needs.

We also present our system configurator (page 20) for improved remote accessibility.

The newest product in this Digital Modular Headend is our ProFlex. This very powerfull and flexible module can receive up to 8 satellite transponders from 4 different inputs. 2 CAM slots are provided for decoding pay TV channels. The module can output the signals either on RF (DVB-T or DVB-C) or either on IP (SPTS or MPTS).

More-over, the bidirectional IP-port can also receive IP-signals and modulate them on a DVB-T or DVB-C carrier.

See our "Universe" in the Digital Modulator and Streamer section.  
+ Rack Mountable (Digital Compact Headend)

# Digital Modular Headends

NEW

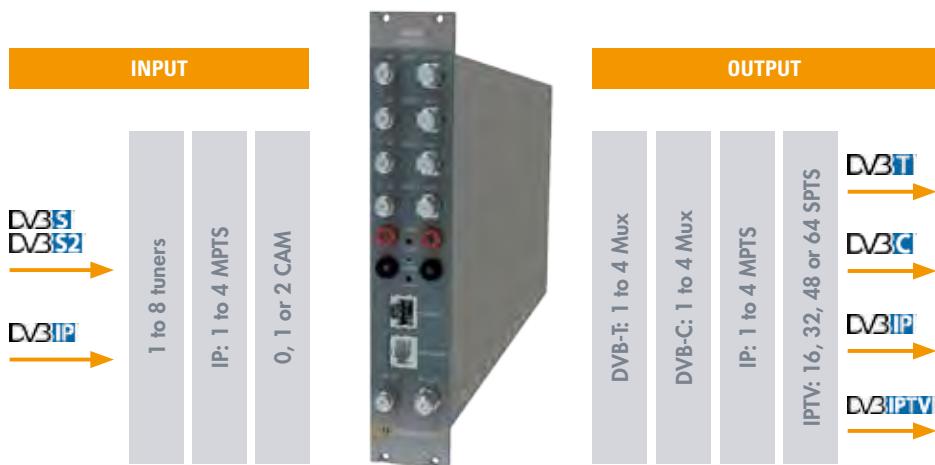

**PROFLEX (QAM, COFDM, IP)** Versatile Modular Headend

The new satellite modules has 4 inputs allowing the reception of 4 different satellite bands per module. Because the module has 8 satellite tuners and a built-in multiswitch, reception of 8 different transponders coming from any of the 4 input satellite bands is possible.

Depending on the type of configuration, up to 4 DVB-T/C multiplexes, 4 MPTS or 64 SPTS streams can be distributed per module, offering you one of the most flexible and cost-efficient solutions available on the market!

5500

- versatile: one module for multiple applications
- flexible: tailor-made configuration
- future proof: configuration upgradable
- scalable: feature upgradable
- feature activation can be time based

# Digital Modular Headends

## PROQUAD DVB-T → DVB-T

The **DVB-T to DVB-T** modules are the ideal solution to regenerate a poor quality DVB-T signal. But the 5310Q and 5311Q are much more powerful than a normal DVB-T regenerator! Each module has 4 DVB-T tuners, and 4 DVB-T modulators. Thanks to a built-in multiswitch, remapping of the programs between the input and the output is possible. This makes it possible to rearrange the multiplexes, delete some programs, change the DVB-T parameters,...

- 4 tuners allow reception of 4 multiplexes per module
- 4 output DVB-T multiplexes per module
- distribute up to 32 programs per module
- decode up to 16 programs per module with multi-service CAM (5311Q)
- easy configuration with built-in webserver
- remote access possibility via RMU ref. 5950

# Digital Modular Headends

**PROSTREAMER** DVB-S(2) → IPTV

Thanks to 4 satellite inputs per module, each module is able to receive the 4 satellite bands. The modules have 4 satellite tuners and a multiswitch inside to offer a fully flexible interconnection between the inputs and the tuners. All IPTV modules have 2 separate Ethernet ports: one for streaming output and one for configuration. This allows the user to separate the streaming traffic from the configuration, to avoid unauthorized access.

- 4 satellite tuners (reception of 4 transponders per module)
- 4 satellite inputs (4 satellite bands per module)
- distribute up to 16 programs per module
- ref. 5203: decode up to 16 programs per module with multi-service CAM (encoded programs from all 4 tuners can be routed through 1 CAM)
- easy configuration with built-in webserver
- remote access possibility via RMU ref. 5950

## **PROSTREAMER** DVB-T → IPTV

Many countries offer a nice bouquet of DVB-T programs, often free-to-air. With the **DVB-T to IPTV** modules, these programs can be distributed over the network via Ethernet. All modules have 4 DVB-T tuners, to receive 4 DVB-T multiplexes.

- 4 tuners allow reception of 4 multiplexes per module
- distribute up to 16 programs per module
- decode up to 16 programs per module with multi-service CAM
- easy configuration with built-in webserver
- remote access possibility via RMU ref. 5950

## ACCESSORIES Remote Management System

5950

- very simple installation
- powerful configuration and monitoring tool with extended graphical user interface (embedded Universal User Interface)
- no network knowledge needed
- use our uCloud to manage all your installations remotely: google maps overview of all your installations, one button-connect to any installation, add pictures and comments regarding the installation...
- safe remote access with certificates and password authentication
- solve problems from wherever you are

| 5950         |     |   |
|--------------|-----|---|
| Connectors   | -   | 2 x USB<br>DC: banana sockets<br>Control: 1 x RJ-45 |
| LEDs         | -   | 1 x alarm LED<br>1 x power LED<br>1 x status LED    |
| Power Supply | VDC | 15  |
| Consumption  | A   | 0,6   |
| Dimensions   | -   | 5RU x 8TE x 180 mm                                  |

The Remote Management Unit (RMU) enables any authenticated user to configure or monitor a specific headend remotely. The RMU is a very smart and powerful solution which connects with a server hosted by us and enables you to connect to any of your installations with any PC or Internet-connected device.

Setup of the unit is as simple as it gets:

Put the RMU in the 19" rack.

Connect the RMU to an Internet-connected switch, together with the DMH modules.

Connect the power.

Go to our hosted website, login and enter the unique code visible on the RMU.

You can now connect to this module from wherever you are on any PC!

**ACCESSORIES** Remote Management System

## System level management

- Automatic device discovery
- Overview of all devices in the system
- Direct remote connection on system level
- Direct device status overview
- Hybrid environment: supports configuration of Ethernet and coaxial devices

## Rich and accessible user interface

- Import-export of settings
- Drag-and-drop functionality
- Status overview of your device
- Interactive dialogues and diagrams

## Digital Compact Headends

- ▶ Johansson developed a nice and versatile range of Digital Compact Headends.

A first product is the new Universe PRO3. This 19" rack mountable Universal Compact Headend enables you to receive 3 transponders from any DVB source (satellite, terrestrial and/or cable) and put it decrypted on your coaxial and IP network.

This Universe PRO3 can also be used as an add-on in your DMH system to enable the DMH to receive DVB-T2 and/or DVB-C signals.

A second product range is the well known Colosseum. Already shortly after the introduction in Germany, these compact TV distribution stations were recommended by several magazines for their ease of use, compactness and most off all, powerful performance! The Colosseum is the perfect solution for hotels, motels, recreation parks, hospitals,... to replace the old analogue TV distribution system with a fully digital one!

## RACK MOUNTABLE Universe PRO 3

This rackmountable Universal Compact Headend enables you to receive any transponder from satellite, terrestrial or cable and put it on your coaxial and IP network.

5600

- receives 3 transponders from any DVB source (satellite, terrestrial or cable)
- decrypts the PayTV channels, when one or more professional CAMs are inserted
- puts the demodulated transponders on your private coaxial and IP network
- can work standalone to insert channels in your existing network
- compatible with SD and HD, with MPEG2 and MPEG4
- supports LCN
- perfect picture quality thanks to a MER, comparable to premium headend equipment
- Plug&Play thanks to a built-in WebGUI

5600

# Digital Compact Headends

## COLOSSEUM DVB-T CI

The Colosseum DVB-T CI (ref. 8501) is a plug & play compact headend for digital TV. The device is ready to distribute up to 64 satellite programs in DVB-T (COFDM). The only thing you have to do is plug in the cables, configure the channels you want and scan the TV's. This makes it an ideal solution to replace the old analogue headends during or after a switch-off from analog to digital.

# Digital Compact Headends

## COLOSSEUM AV

The Johansson Colosseum AV is the perfect solution to distribute AV sources (DVD, set-top boxes, PC, Camera,...) over the coaxial distribution network in DVB-T (COFDM) format. The Colosseum AV is a compact and plug&play solution.

8530 | 8530 UK  
8535 | 8535 UK

- ref. 8530/8530UK: distribute up to 8 AV sources over the coaxial network in digital (DVB-T) format
- ref. 8535/8535UK: distribute up to 4 AV sources over the coaxial network in digital (DVB-T) format
- compact and innovative design
- easy plug&play installation
- edit all kinds of parameters: LCN numbers (configurable for all countries), resolution, brightness, aspect ratio, hue, saturation, ...
- configure with built-in webGUI

## HDMI MODULATOR

This HDMI modulator enables you to transmit your HDMI signal over your coaxial network.

8200 | 8200 UK

- 1 HDMI input, capable of receiving all standard resolutions
- 1 RF input, to by-pass terrestrial or cable signals
- 1 RF output, where the HDMI signal is added to the signals from the RF input
- perfect picture quality thanks to a MER, comparable to premium headend equipment
- easiest menu structure on the market with the Johansson rotary button and display
- lowest power consumption
- 8200UK is delivered with a UK power cord

8200 | 8200 UK

### HDMI Input

|                  |   |                  |
|------------------|---|------------------|
| Video resolution | - | 576i up to 1080p |
| Video encoding   | - | H264/AVC         |
| Audio encoding   | - | MPEG1 Layer II   |
| Connector type   | - | HDMI Type A      |

### RF Input

|                   |     |          |
|-------------------|-----|----------|
| Frequency         | Mhz | 5 - 1002 |
| Loss to RF output | dB  | 2        |

### RF Output (=RF Input signal + HDMI modulated transponder)

|                             |      |  |
|-----------------------------|------|--|
| Modulated channel frequency | MHz  | 170-230 / 470-862 (channel plan: E5-E12 / E21-E69) |
| Output level                | dBµV | 75-90 (adjustable)                                 |
| MER                         | dB   | Typ. 40  |

### DVB-T Settings

|                   |     |                       |
|-------------------|-----|-----------------------|
| Modulation        | -   | 2K/8K up to 18 Mbit/s |
| Constellation     | -   | QPSK / 16QAM / 64QAM  |
| FEC               | -   | 1/2 up to 7/8         |
| Guard interval    | -   | 1/4 up to 1/32        |
| Channel bandwidth | MHz | 7-8                   |

### Configuration

|                        |   |  |

# Digital Modulator and Streamer

**UNIVERSE**

LCN SUPPORTED

This universal Compact Headend enables you to receive any transponder from Satellite, Terrestrial or Cable and put it on your coaxial and IP network.

8600

- receives 1 transponder from any DVB source (satellite, terrestrial or cable)
- decrypts the PayTV channels, when a professional CAM is inserted
- puts the demodulated transponder on your private coaxial and IP network
- can work standalone to insert channels in your existing network
- more products can be combined to make a complete headend (cascadable inputs and outputs foreseen with remote powering capabilities)
- compatible with SD and HD, with MPEG2 and MPEG4
- supports LCN
- perfect picture quality thanks to a MER, comparable to premium headend equipment
- Plug&Play thanks to a built-in WebGUI

8600

## Input

|                                |         |  |
|--------------------------------|---------|--|
| Number of inputs               | -       | 1 with passive loop-through (-2 dB)                    |
| Tuners                         | -       | 1  |
| Frequency range                | MHz     | 42-2150  |
| Input level                    | dBm     | -65 to -20   |
| Standard                       | -       | DVB-S/S2   DVB-T/T2   DVB-C                            |
| DC remote power for LNB or LNA | V<br>mA | 0 / 13 / 18 / 22 kHz / DiSEqC, EN50494, EN50607<br>350 |

## RF Output

|                             |     |  |
|-----------------------------|-----|--|
| Number of outputs           | -   | 1 RF with passive loop-through (-2 dB) |
| Multiplexes                 | -   | 1                                      |
| Frequency range             | MHz | 174-862                                |
| Output level                | dBm | -55 to -10 (adjustable)                |
| Standard                    | -   | DVB-T   ISDB-T                         |
| Modulation error rate (MER) | dB  | 40                                     |

## Ethernet output

|                   |   |                                 |
|-------------------|---|---------------------------------|
| Number of outputs | - | 1 Gb Ethernet                   |
| Standard          | - | IEEE 802.3ab 10/100/1000 Base-T |
| Protocol          | - | Multicast IP/UDP                |
| Transport stream  | - | SPTS/MPTS*                      |

## General

|                       |     |  |

## SAT>IP

# INDEX

## SAT>IP

- Multituner SMATV Server 38
  - Multiswitch 39
- 

Sat&gt;IP

**SAT>IP™** is a revolutionary technology for the cost-effective distribution of satellite signals via in-home or private IP networks. The rack mountable **SAT>IP™** Multi Tuner SMATV server supports both dynamic and static operation; a combination of these modes is also possible.

In static mode the rack mountable **SAT>IP™** Multi Tuner SMATV server can receive signals from 4 satellite bands and multicast up to 32 channels on your private IP network to a large amount of clients.

In dynamic mode 32 clients can simultaneously watch every channel which is available on the 4 satellite bands.

5400

- 4 LNB inputs for Quattro or Quad LNB. If the LNB is not already powered use the 9930 for Quattro and Quad LNB
- 4 trunk outputs for cascading multiple server units
- support both static and dynamic operation
- streams satellite TV (SD and HD) and radio over IP
- configuration with built-in webserver

5400

# SAT>IP™

## MULTISWITCH IP Multiswitch

**SAT>IP™** enables you to watch satellite TV on your smart phone, tablets, PC and also your standard TV as well as smart TV. **SAT>IP™** is a revolutionary technology for the cost-effective distribution of satellite signals via in-home or private IP networks.

This **SAT>IP™** enabled multiswitch is the perfect solution to provide TV signals over **Ethernet** or **WiFi**. All channels available over satellite can be followed on hand-held devices, smartphones and tablets, using the **SAT>IP™** app for Android and iOS.

The **SAT>IP™ multiswitch** can be powered by Power over Ethernet (PoE), making an external power supply or adapter superfluous. In case the routers or switches in the building are not yet PoE-enabled, an optional PoE power supply can be delivered to power the unit.

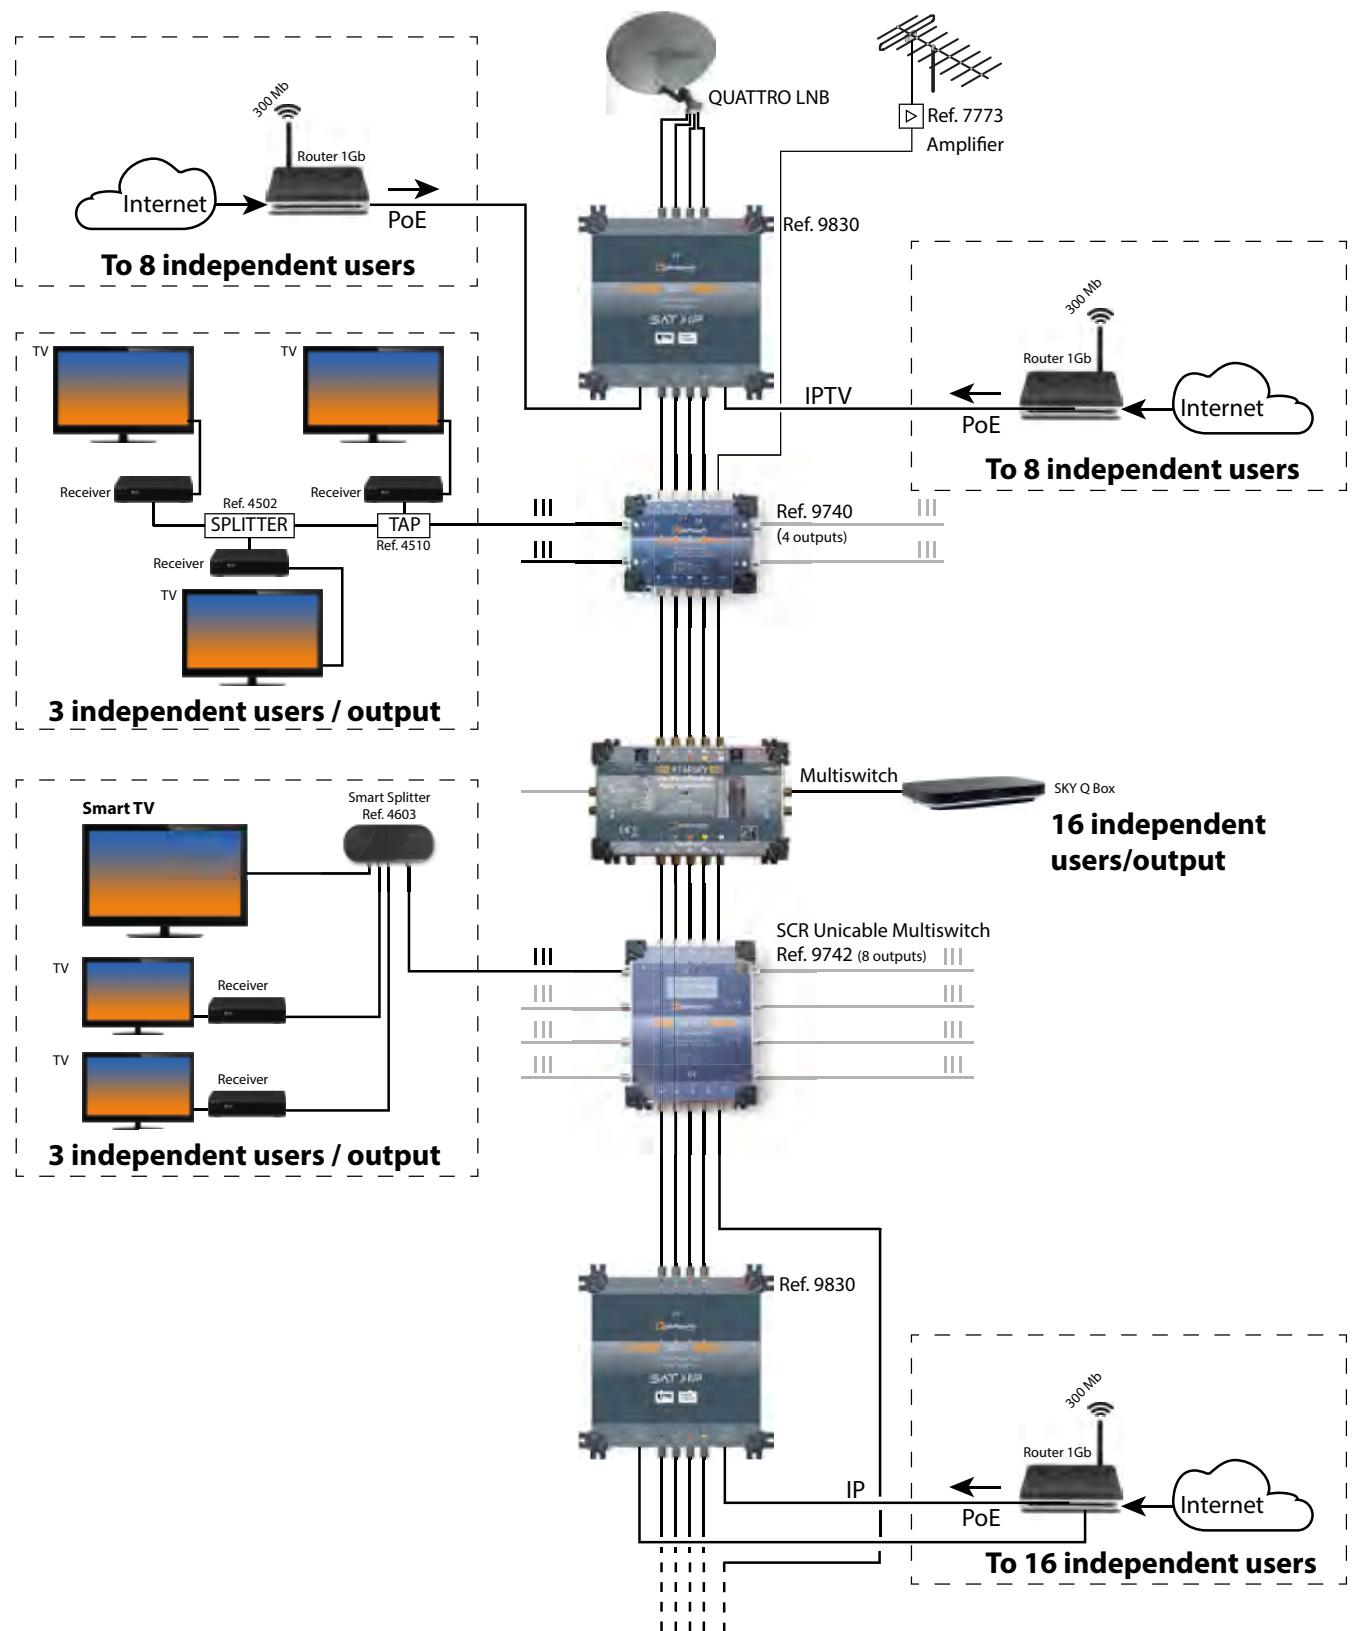

This scalable multiswitch system can receive signals from 4 satellite bands and can distribute up to 16 IP streams through 2 Gigabit Ethernet ports. **This means 8 users per household can independently watch TV!**

- 4 LNB inputs for Quattro or Quad LNB
- 4 Trunk outputs for cascading with any type of Multiswitch, as well in new or existing installations
- 2 IP outputs, each supporting up to 8 independent users on a gigabit network
- streams satellite TV (SD and HD) and radio over IP

## SAT Distribution (SCR & Legacy)

► Multiswitches are a key element in the distribution of satellite signals over coaxial cable throughout big buildings. In many cases there is only one coax cable available from the technical riser to the apartment.

UnitronGroup offers a wide range of multiswitches with integrated 'SCR' technology. With those multiswitches, you can connect multiple set-top boxes for multi-room applications to numerous satellites using one coax cable only!

By enabling Single Cable Router mode in Unitron's "Johansson SCR multiswitch" we simplify the deployment and lower the overall cost of satellite service installation.

## DIGITAL SCR LNB dLNB

The SCR technology has widely expanded the capabilities of satellite multiswitches. Since this technology is a great success in our products and on the market, it was the perfect time for Unitron to take the next step: putting the SCR technology into LNBs.

This opens up a lot of new and very cost effective solutions for our customers. Unitron has developed 2 different use cases for these digital LNB products, based on the following specifications.

- LNB, able to receive 1 Ku satellite orbital slot
- connect up to 24 or 32 users
- high output power (AGC controlled)
- low noise
- multistandard support: EN50494 / EN50607. Other standards, like FSK, on request
- both products can be programmed in static or in dynamic mode

# SAT Distribution (SCR & Legacy)

NEW

DIGITAL SCR LNB dLNB

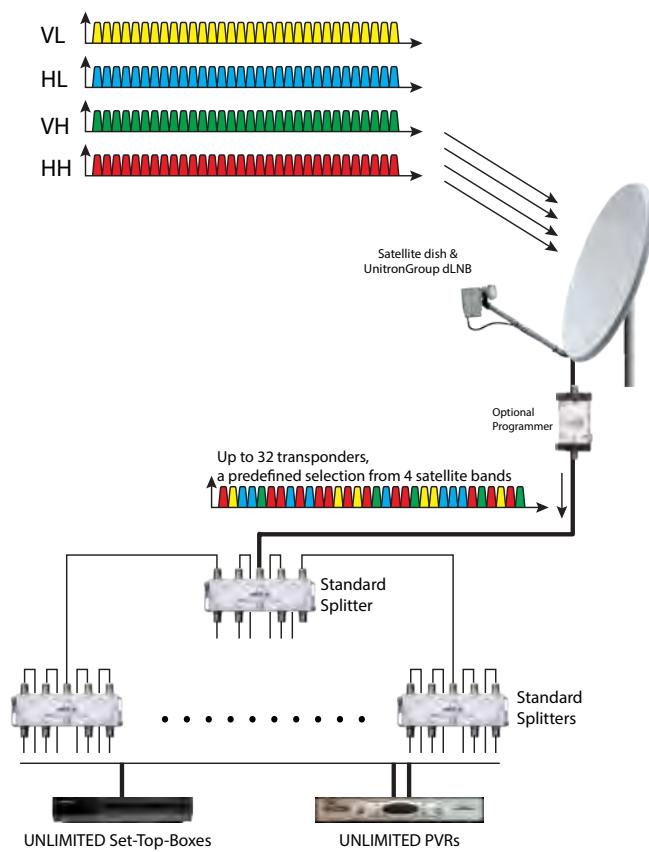

## USE CASE 1

The first use case is for SFU or small MDU applications, where up to 32 users can connect to the dLNB. Each of those users can independently connect to any transponder of 1 satellite orbital position, for instance Astra 23.5°E. The following installation describes this "dynamic" setup:

## USE CASE 2

The second use case is suited for all MDU applications, but the bigger the more cost effective this solution becomes. In fact the dLNB serves as a complete headend and if the system is well designed, the distribution of the satellite signal downstream from the LNB, can be done with simple splitters and taps. No need for expensive satellite distribution!! The way the dLNB is configured, can be done both by the installer or by the operator over the air. The following installation describes this "static" setup:

For more detailed information or cooperations, please contact our sales team.

## DIGITAL SCR MULTISWITCH

The 974xSKY products are designed to support a wide range of new and existing multiswitch installations. Have a mixed network of STBs, not a problem with the Johansson SCR family of multiswitches. Auto detection of what type of STB is on the network, is built-in to all our solutions.

**16UB**  
User Bands

9746SKY

- 8 SCR outputs
- up to 16 UBs per SCR Output
- auto detection for SCR and Legacy Mode
- support all SCR standards
- compatible with all Legacy STBs
- amplified/bypass terrestrial diplexer
- soft power-up mode for Legacy
- power diagnostics for trunk power
- supports the channelplan of the SKY Europe family of operators (SKY UK, SKY Italia and SKY Germany)

**16UB**  
User Bands

9748SKY

- 16 SCR outputs
- up to 16 UBs per SCR Output
- auto detection for SCR and Legacy Mode
- support all SCR standards
- compatible with all Legacy STBs
- amplified/bypass terrestrial diplexer
- soft power-up mode for Legacy
- power diagnostics for trunk power
- supports the channelplan of the SKY Europe family of operators (SKY UK, SKY Italia and SKY Germany)

Variants can be made on request.

Custom SW solutions are available to meet unique systems needs

## DIGITAL SCR MULTISWITCH

### TYPICAL APPLICATION FOR THE UK:

# SAT Distribution (SCR & Legacy)

NEW

## DIGITAL SCR MULTISWITCH

Over the last few years, standard (Legacy) multiswitches have been replaced by more efficient SCR multiswitches, see the 9730I through 9762 product range. In these cases, the bandwidth was used 3 times better and 3 times less cables needed to be installed.

With the new transition to digital SCR, we can easily make the installations 5 times more efficient. Or improve the user experience by allowing each family to have 5 tuners installed per apartment. This is ideal for multiroom viewing experiences without sacrificing the possibility of watch-and-record features.

Today, Unitron is proud to announce this digital SCR multiswitch with 5 userbands per outlet and allowing up to 4 satellite orbital positions, when using wideband LNBs.

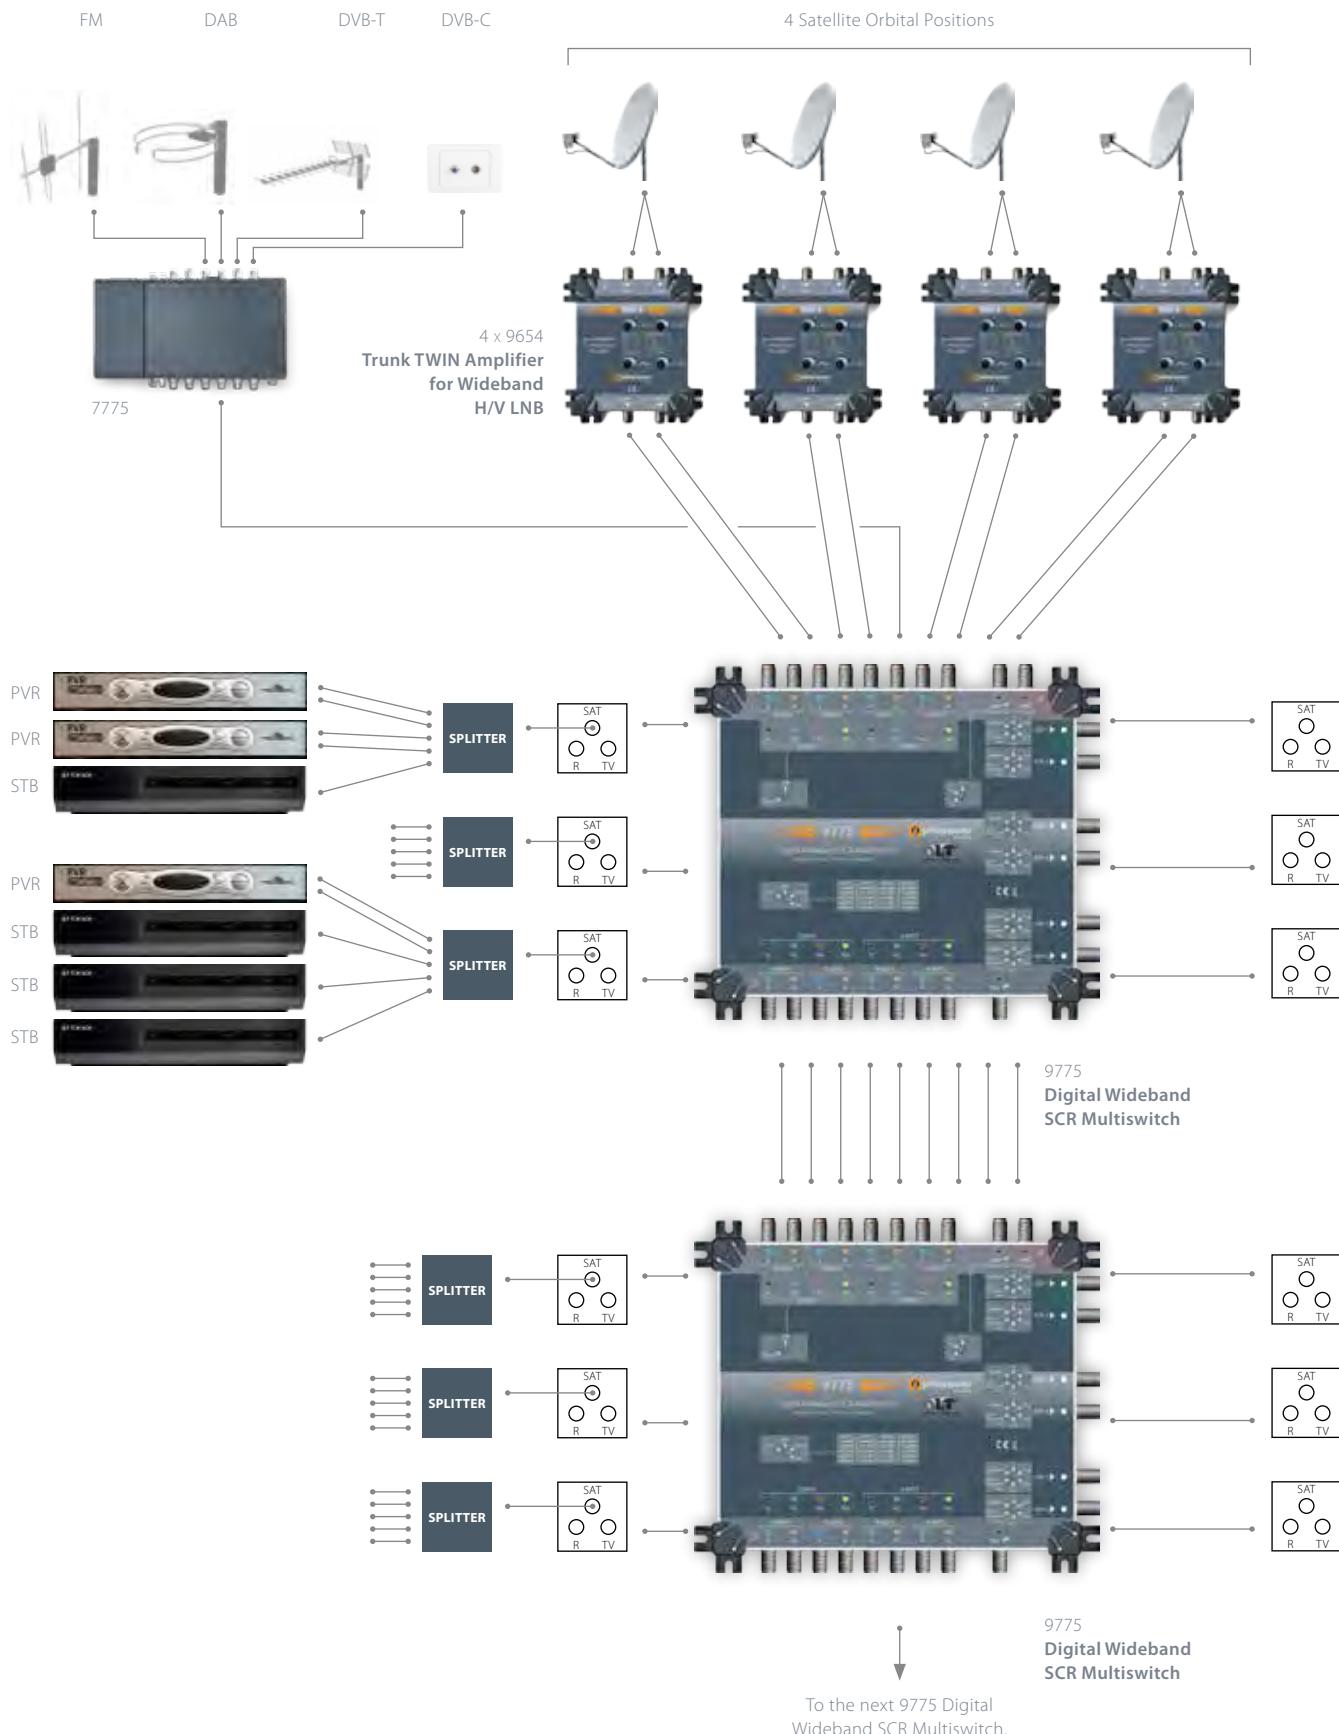

- 8 satellite wideband inputs
  - compatible with 4 wideband LNBs
  - compatible with 2 Quattro LNBs
- 6 SCR outputs with each 5 User Bands
- 1 CATV input
- 1 Terrestrial input

DIGITAL SCR MULTISWITCH application with wideband LNBs

# SAT Distribution (SCR & Legacy)

## SMART SPLITTER

Standard splitters can give collisions when two commands come at the same time or when one of the set-top boxes uses a permanent high voltage. A smart splitter captures the commands of the different set-top boxes and serializes them to guarantee no collisions happen.

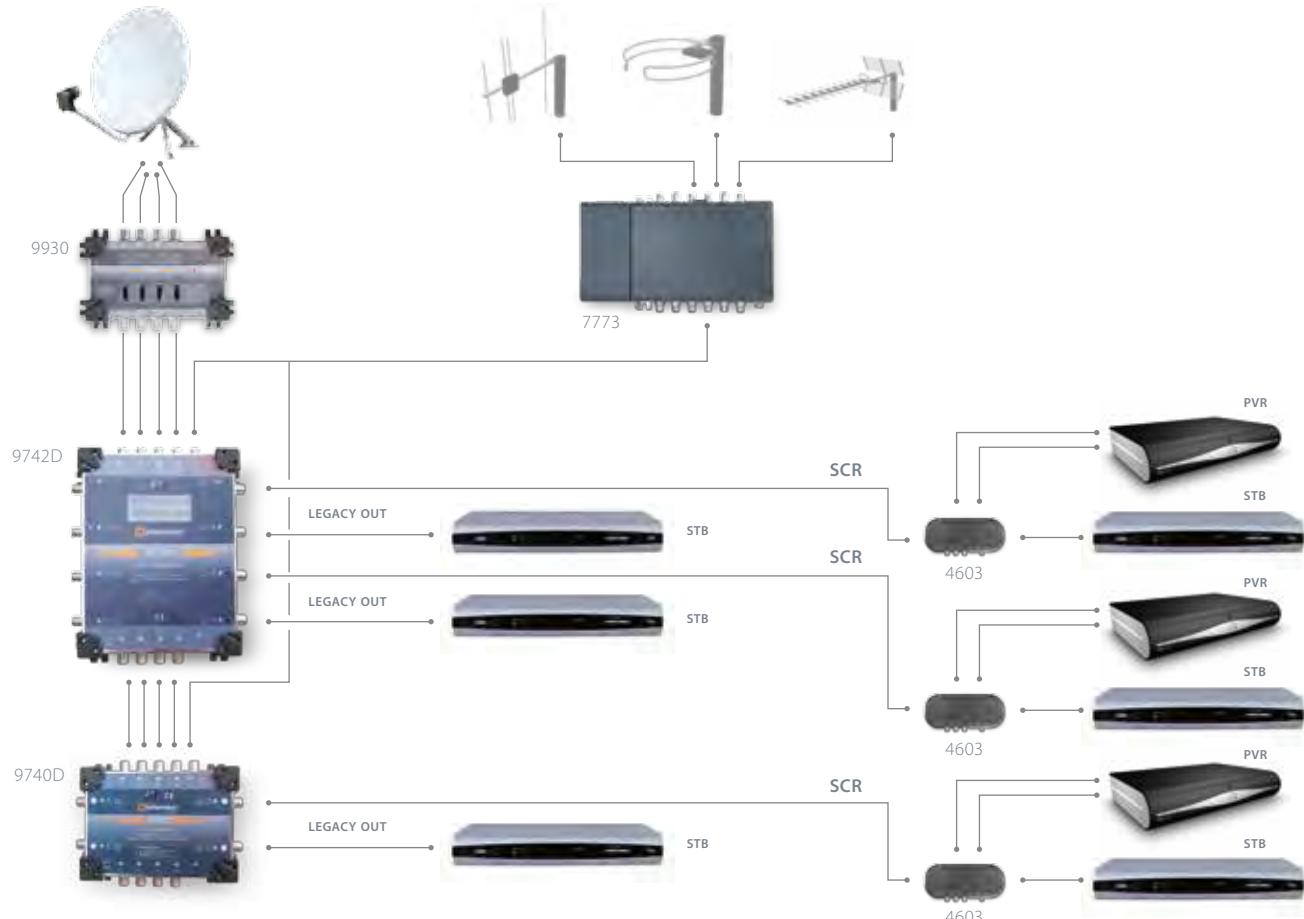

4603

- indoor housing
- 3-way
- no power adapter needed
- buffers and sends out the different command signals

4603

## MULTI BAND CONVERTER Stacker - Destacker

The Stacker-Destacker is the perfect solution to upgrade an old single-cable system with a twin (or quad) LNB to be used in combination with a dual input receiver (PVR) or 2 separate single input receivers. The advantage of using the Stacker-Destacker is that you don't need an additional cable. The Stacker converts the frequencies of the second input, so it is literally stacked above the frequencies of the first input. The Destacker converts the frequencies back to the original ones.

This new version of the Stacker-Destacker doesn't need an additional power adapter by default. Thanks to the built-in attenuator with adjustment, it is protected against high input signals, avoiding saturation of the device.

9645 KIT

- no power adapter needed! Power the device with the satellite receiver.
- built-in switchable attenuator to protect against high input signals
- Transparent for unidirectional DiSEqC®  
(receive signals from up to 4 satellites)
- wide band 5-2150 MHz to combine terrestrial signals (FM, DAB, TV)
- no additional coax cable needed between dish and receiver
- no need to replace the existing cable
- transparent system
- no degradation of picture
- HD compliant

## POWER SUPPLY/2-WAY SMARTSPLITTER

NEW

This power inserter (with integrated smart splitter) is designed to power the dSCR products from the dSCR outputs (in case the set-top box does not provide enough power).

2461

- powers SCR products without overloading the set-top boxes
- copies the set-top box voltage, tone and DiSEqC to the SCR product (EN50494 and EN50607)

## LNB POWER INSERTER

The 9930 is a satellite power inserter, which can be used to ensure a universal LNB is locked on the correct satellite band. Each of the 4 inputs can be configured to deliver the desired control signals (13/18V + 0/22 kHz). The selected control signal is indicated by a bi-color LED.

- 4 satellite inputs / 4 satellite outputs
- frequency range: 5-2150 MHz
- current/input: up to 350 mA
- low insertion loss: <1 dB
- independent satellite band for each input (indicated by bi-color LED)

# Wideband Satellite Distribution

- Wideband Satellite Distribution is a new and more efficient way of distributing satellite signals. While in universal LNBs, the Ku band is split in a low and high part for both vertical and horizontal polarisation, the wideband LNB converts each polarisation as a whole, leaving only 2 cables coming from the LNB.

This is a much more efficient way of distribution, with the following benefits.

- lower consumption in all products of the distribution
- lower cost of the products
- less cables needed, making the installation cheaper
- less connections, which leads to a more reliable system

## WIDEBAND LNB

The first product in this wideband satellite range is the Wideband LNB. It receives any standard Ku satellite signal and generates a Horizontal and Vertical IF signal. Each output contains both the low and the high band of the polarization.

9720

- LNB, able to receive 1 Ku satellite orbital slot
- 1 Horizontal and 1 Vertical output
- low noise
- output frequency range 290-2340 MHz

9720

## WIDEBAND TO QUATTRO CONVERTOR

This wideband to quattro convertor makes it possible to upgrade a complete system to a wideband application, without disabling the homes that do not have wideband tuners.

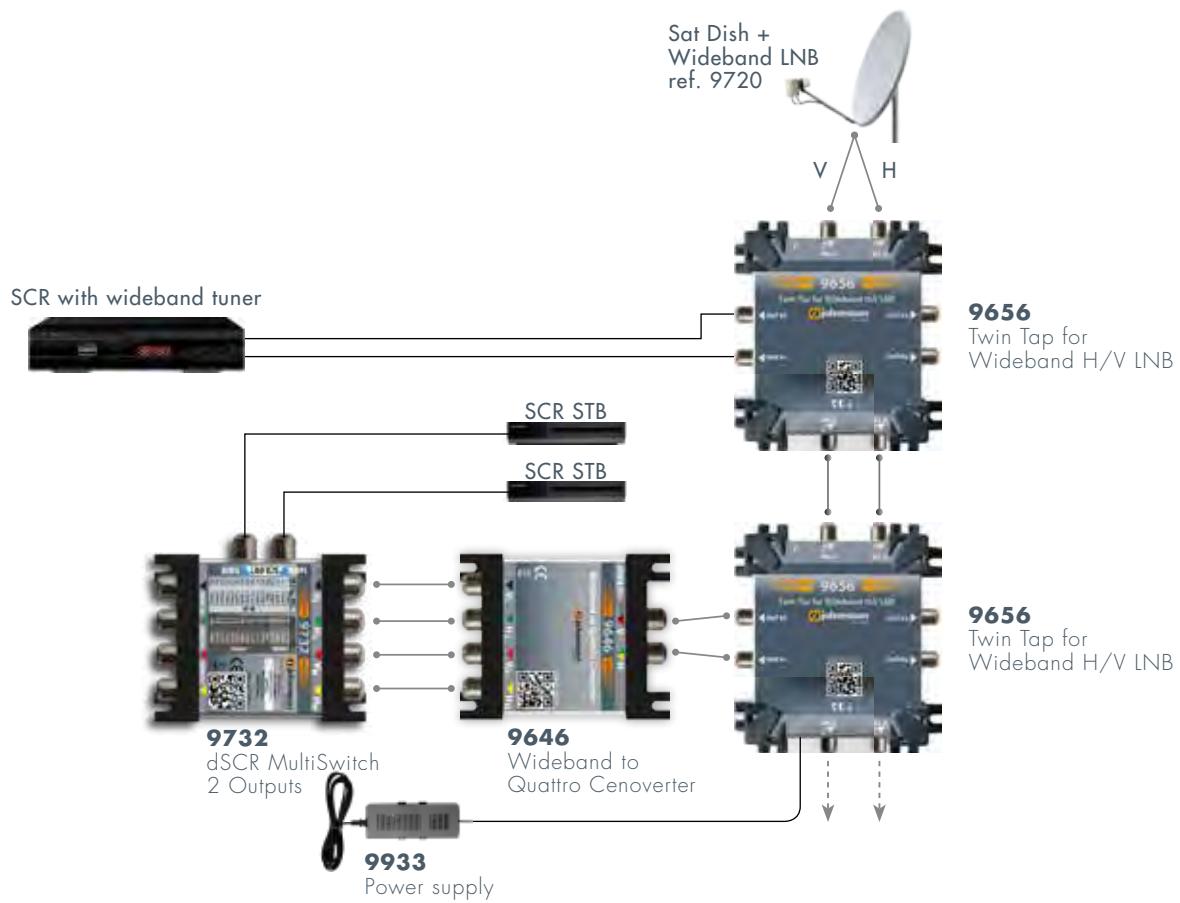

**9646**

- converts a wideband LNB (V,H) into a quattro LNB (VL, HL, VH, HH)
- DC pass through on VL to power the wideband LNB
- ideal for systems with a mix of new wideband Set-Top-Boxes and other Set-Top-Boxes

## profilers

- ▶ The well-known Profilers are a range of programmable filter-amplifiers. The signals coming from multiple antennas can be combined, filtered and amplified, to offer the best possible signal for distribution of TV throughout the building. The profilers are very flexible and can be configured to your specific needs. We offer a broad range of profiler products, to fulfill your specific needs.

# Profilers

## PROFILERS Super Profiler

The next generation profilers, commercialized as Profiler PLUS and Super Profiler, offer even better performance than their predecessors! Thanks to a new, in-house developed technology, the selectivity of the filters has noticeably increased. Because the new profilers have 4 UHF inputs, and 10 highly selective filters, even the most exotic situations are covered.

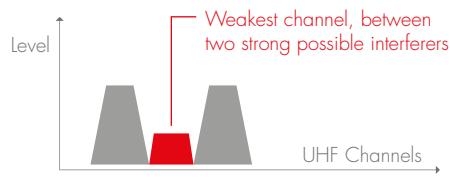

The Super Profilers have two built-in super selective single-channel filters with a selectivity of 30 dB at only 1 MHz. A very attractive feature is the frequency conversion: A multiplex can be converted to another frequency channel, offering you the possibility to manage your own frequency plan. This can be done by removing unwanted interferers, and moving the multiplexes of interest to other frequencies to avoid saturation or interference.

Configuration is done with a standalone remote control unit (ref. 6565).

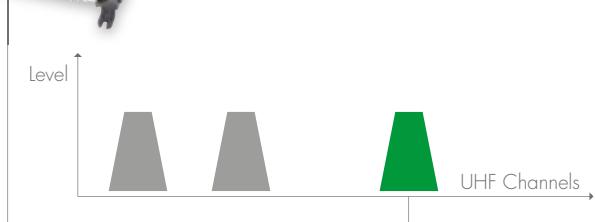

6630 | 6630 UK

- 7/8 inputs: 4 x UHF/Bi-FM/BIII+DAB/AUX
- highly selective filters thanks to new filter technology (LTE proof)
- 2 super selective single channel filters: 30 dB @ 1 MHz
- 8 UHF filter clusters (30 dB @ 16 MHz): 1 to 7 channels bandwidth
- frequency conversion functionality
- high output level: >120 dB<sub>P</sub>V
- 2 programmable outputs
- high-efficiency and ultra-reliable power supply (detachable)
- easy programming by dedicated control unit (ref. 6565)
- 6630 UK is delivered with UK power cord

## PROFILERS Profiler

All profiler models have an automatic signal level equalizer, helping you to find the optimal gain for each filter. The profilers are equipped with a display, indication LEDs and a rotary button to make the configuration an easy task. Thanks to our memory-stick (ref. 6604), settings can easily be transferred from one unit to another. To avoid unauthorized people changing the settings, all Profiler products can be locked with a security code.

6600 | 6600A | 6600UK

- 6 inputs: BI-FM/BIII/VHF-UHF/3 x UHF  
(UK version : FM/BIII/VHF-UHF/3 x UHF)
- 10 UHF programmable clusters from 1 to 7 channels bandwidth.
- high gain (55 dB) and high power (118 dB $\mu$ V)
- 24 V remote power on UHF and VHF-UHF inputs  
(12V for 6600UK and 6600A)
- VHF-UHF split band amplifier with inter-stage attenuators
- -30 dB test output

# Profilers

NEW

## PROFILERS Profiler US

This profiler is designed for application where the UHF channels are only 6 MHz wide, this is for instance the case in the US. The other specifications are similar to the 6600.

PFA-6600UAM

- 6 inputs: VHF Low-FM/VHF High/VHF-UHF/3xUHF
- 10 UHF programmable clusters from 1 to 7 channels bandwidth.
- high gain (55 dB) and high power (118 dB<sub>p</sub>V)
- 24 V remote power on UHF and VHF-UHF inputs
- VHF-UHF split band amplifier with inter-stage attenuators
- -30 dB test output

PFA-6600UAM

# Profilers

## PROFILERS Profiler VHF

The Profiler VHF is based on the normal Profiler, but offers 2 independent BIII/DAB inputs, and 2 programmable BIII/DAB filter clusters.

- 6 inputs : BI-FM/2 x BIII/3 x UHF
- 8 UHF programmable clusters from 1 to 7 channels bandwidth
- 2 BIII programmable clusters from 1 to 4 channels bandwidth
- high gain (55 dB) and high power (118 dB $\mu$ V)
- 24 V remote power on BIII and UHF inputs
- VHF-UHF split band amplifier with inter-stage attenuators
- -30 dB test output

## PROFILERS Profiler VHF+

The new Profiler VHF+ completes the well-known Profiler range offering ideal solution to filter and amplify both VHF and UHF for the reception of digital SD and HD signals.

6608

- 5 inputs headend amplifier
  - BIII/DAB with 4 programmable clusters (1 to 4 channels bandwidth)
  - 2 x UHF splitted over 6 programmable clusters (1 to 7 channels bandwidth)
  - BI-FM
  - VHF-UHF
- 4G/LTE proof (UHF Ch. 21 to 60)
- easy programming by using one rotary/push button viewed on 2 digits display and LEDs for each cluster and each input
- unit can be locked by security code. -30 dB test output
- "copy" function in order to transfer all settings from one unit to another (or with optional memory stick) reducing time of installation
- high selectivity filters
- low noise figure and high power split band amplifiers
- high UHF input levels up to 105 dB<sub>P</sub>V by switchable 20 dB input amplifier
- automatic leveling of signal or manual with 30 dB attenuator with 1 dB step for accurate equalization
- selectable remote power on BIII/DAB, VHF-UHF and UHF inputs
- -30 dB test output

# Profilers

## PROFILERS Profiler Lite 10

The Profiler Lite devices are slimmed down versions of the basic 6600 Profiler, offering the same flexibility, but a lower gain, less filter clusters and a lower number of inputs. These are ideal for smaller buildings, where the high gain of the 6600 Profiler is not needed.

6601 | 6601A | 6601UK

- 5 inputs : BI-FM/BIII/3 x UHF (UK version: FM/BIII/3 x UHF)
- 10 UHF programmable clusters from 1 to 7 channels bandwidth
- gain: 45 dB
- 24 V remote power on UHF inputs (12V for 6601UK and 6601A)
- VHF-UHF split band amplifier with inter-stage attenuators
- -30 dB test output

# Profilers

## PROFILERS Profiler SAT | Profiler SAT+

In some situations the rooftop terrestrial antennas are accompanied by a satellite antenna, and both terrestrial and satellite signals have to be combined on the same coaxial cable for distribution throughout the building. The Profiler SAT series is the ideal product for these situations, by extending the normal Profiler with a satellite input.

- 1 SAT input + 6 Terrestrial inputs : BI-FM/BIII/VHF-UHF/3 x UHF
- 10 UHF programmable clusters from 1 to 7 channels bandwidth
- VHF-UHF-SAT split band amplifiers with inter-stage attenuators
- high gain (55 dB) and high output power (116 dB $\mu$ V)
- 0-13-18 V / 0-22 kHz remote power for LNB
- VHF-UHF split band amplifier with inter-stage attenuators
- -30 dB test output

Profiler SAT  
6602

- 1 SAT input + 6 Terrestrial inputs : BI-FM/BIII/VHF-UHF/3 x UHF
- 2 outputs: TV/TV-SAT
- 10 UHF programmable clusters from 1 to 7 channels bandwidth
- VHF-UHF-SAT split band amplifiers with inter-stage attenuators
- high gain (50 dB) and high output power (110 dB $\mu$ V)
- 0-13-18 V / 0-22 kHz remote power for LNB
- VHF-UHF split band amplifier with inter-stage attenuators
- -30 dB test output

Profiler SAT+

## PROFILERS Profino Plus

In situations where a medium gain (in the order of 45 dB) is sufficient, and the high number of antenna inputs is not needed, the Profino could be the ideal solution! The Profino is more compact than a normal Profiler, and apart from the reduced number of inputs, filter clusters and gain, the operation is identical to the other Profilers.

6611L | 6611L UK

- designed for both analogue and digital SD/HD channels
- 4 inputs: FM, BIII/DAB and 2 UHF inputs splitted over 6 UHF programmable clusters
- UHF clusters can have 1 to 7 channels bandwidth
- channel 21-60, 4G-LTE compatible
- easy programming by using one rotary/push button viewed on 2 digits display and LEDs for each cluster and each input
- unit can be locked by security code
- "copy" function in order to transfer all settlements from one unit to another reducing time of installation
- high selectivity filters
- low noise and high gain split band amplifiers
- high UHF input levels up to 105 dB<sub>P</sub>V by switchable 20 dB input amplifier
- attenuator with 1 dB step for accurate equalization
- selectable remote power on BIII/DAB and UHF inputs
- 12 - 24V selectable remote power
- -30 dB test output

# Profilers

## EQUALIZERS 4 IF Channel Processor

The 6520 offers 4 super-selective SAW filters in one compact sized zamak diecast housing. These filters can be used to convert 4 digital terrestrial channels to another frequency in the UHF band. Of course it can also be used as a super-selective single-channel filter in case a normal UHF filter is not sufficient (e.g. strong interference from an LTE source, or adjacent channel interference).

The 6520 can also be used as an extension with an existing Profiler Plus or Super Profiler. By connecting the 6520 to the AUX input of the Profiler, 4 frequency converting SAW filters are added to the system. And of course, it is also possible to interconnect several 6520's to provide more frequency converting single-channel filters.

The 6520 can be controlled by means of a remote control (ref. 6565).

6520

- 4 super selective single-channel filters: 40 dB @ 1.25 MHz
- 4 frequency converters to convert a digital channel to another UHF frequency
- auto install functionality: device automatically finds all digital channels, and lets the user choose the channels of interest
- interconnection of several 6520's or use in combination with a Super Profiler or Profiler Plus
- medium gain: 40 dB

# Profilers

## ACCESSORIES Control Unit

The 6565 control unit is designed to control the Johansson products through the coax cable. Many products, like profilers, active combiners,... can be configured with this device. Thanks to a clear OLED display and easy rotary button, configuration is made very easy. A great advantage is that you can control the Profiler from wherever you are in the building. Just connect the control unit to the nearest outlet and you will be able to configure the Profiler, without even standing next to it!

# Amplifiers

- An essential part in the distribution of TV signals over coaxial cables is the amplifier. In domestic applications, this will typically be a masthead preamplifier while large collective installations require high-power distribution amplifiers. With the upcoming LTE (4G and 5G) signals in several countries, big disturbances will arise in the TV systems that are not LTE-protected. This is why we present a whole new range of amplifiers that makes your installations future proof, and offer you the best TV images possible!

## TERRESTRIAL DISTRIBUTION AMPLIFIERS Multiband Amplifiers

The new distribution amplifiers from Johansson set the new standard! The amplifiers are fully LTE-ready and have a high gain, ensuring a perfect signal quality throughout the building. Thanks to the new technologies used, the amplifiers are far more efficient than their predecessors.

7773(UK) | 7774(UK) | 7775(UK)

- 3/4 inputs
- VHF-UHF input with return path (ref. 7774, 7775), ideal for CATV applications
- split-band amplifiers with interstage attenuators and dynamic range of 30
- high gain (up to 40 dB), high output power (>122 dB<sub>p</sub>V)
- slope adjustment on VHF-UHF (ref. 7774, 7775)
- high input power: up to 110 dB<sub>p</sub>V (saturation of input virtually impossible)
- 5/12 VDC switchable remote voltage to power a preamplifier
- thanks to the new technology used, the efficiency of the amplifiers is 400% better compared to older amplifiers!
- green solution: 5,5W for high power model / <3W for mid and low-power models
- zamak diecast housing
- detachable power supply included
- -30 dB test output
- UK versions are delivered with UK power plug

## PREAMPLIFIER UHF Preamplifier (LTE/5G)

7329

- 1 input/1 output
- LTE (5G) rejection
- low-noise
- 15-35 dB adjustable gain
- power indication LED
- 24 VDC operating voltage

7329

|                 |            |                     |
|-----------------|------------|---------------------|
| Frequency range | MHz        | 470-694 (Ch. 21-48) |
| Gain            | dB         | 15 - 35             |
| Noise figure    | dB         | 3,5                 |
| Input level     | dB $\mu$ V | 82                  |
| Output level    | dB $\mu$ V | 104                 |

## VHF/UHF PREAMPLIFIER

7415L

- FM input/B.III or DAB input/UHF input
- 1 wideband output
- 12 dB gain on FM
- 15-30 dB adjustable gain on B.III/DAB
- 20-35 dB adjustable gain on UHF
- LTE (4G)
- low-noise
- 24 VDC operating voltage
- wall or mast mountable

7415L

## VHF/VHF-UHF UNIVERSAL PREAMPLIFIER (1 input/2 outputs)

7462

- 1 universal input: VHF only, UHF only or VHF+UHF (switchable with jumpers)
- 2 wideband outputs
- up to 105 dB $\mu$ V output power
- 7-22 dB adjustable gain on VHF
- 7-22 dB adjustable gain on UHF
- LTE (4G) + GSM rejection
- low-noise
- power indication LED
- DC power pass (with jumper)
- 5-24 VDC operating voltage

7462

|                   |            |                                 |

## POWER SUPPLY FOR dSCR

This power supply is designed to power the trunk lines or the DC input connector.

2460 | 2460UK

|                  | 2460 |               | 2460UK |
|------------------|------|---------------|--------|
| Input voltage    | VAC  | 100 - 240     |        |
| Output voltage   | VDC  | 20            |        |
| Output current   | A    | 3,25          |        |
| Output Connector | -    | F-type        |        |
| Dimensions       | mm   | 115 x 55 x 35 |        |

## POWER SUPPLY/2-WAY SMARTSPLITTER

NEW

This power inserter (with integrated smart splitter) is designed to power the dSCR products from the dSCR outputs (in case the set-top box does not provide enough power).

2461

- powers SCR products without overloading the set-top boxes
- copies the set-top box voltage, tone and DiSEqC to the SCR product (EN50494 and EN50607)

## FILTERS LTE + GSM Filter

Long Term Evolution (LTE) is a consequence of the digitization of the TV-signals. Digital signals offer a great bandwidth-advantage, which will be used for next-generation telecommunication applications (4G). This implies the UHF channels 61-69 will no longer be used for TV-purposes, and have to be filtered-out carefully to avoid interference! Our LTE-ready products offer strong filtering capabilities for the UHF channels 61-69 and the GSM-band.

The next LTE evolution is already happening. For the 5G networks, the UHF-channels will be limited to 694MHz (or channel 48). Look for the 5G logo in our catalog to find compatibel products.

### LTE (4G) + GSM FILTER

- >15 dB LTE rejection
- wall or mast mountable with strap
- indoor and outdoor mountable

6022GSM

Example of outdoor product

6022GSM

| Frequency range           | MHz | 5-790                                      |
|---------------------------|-----|--|
| Cut off channel           | -   | 60   |
| Insertion loss            | dB  | 1  |
| GSM rejection 880-960 MHz | dB  | 60   |
| LTE (4G) rejection        | dB  | 20   |
| DC power pass             | mA  | 500  |
| Connectors                | -   | 2 x F female                               |
| Mounting                  | -   | Indoor/outdoor<br>(indoor flange provided) |
| Dimensions                | mm  | 112 x 98 x 56                              |

### LTE (4G) FILTERS

- 25 dB LTE rejection
- in-line small housing
- indoor use

6023C57 | 6023C58 | 6023C59

6023C57 | 6023C58 | 6023C59

| Frequency range    | MHz | 5-766         | 5-774         | 5-782         |
|--------------------|-----|---------------|---------------|---------------|
| Cut off channel    | -   | 57            | 58            | 59            |

## SPLITTERS Wideband Indoor Splitters 5-2340 MHz

Compatible with Wideband LNBS

- 2, 3, 4, 6, 8-way wideband splitters
- low insertion loss
- nickel plated zinc diecast housing
- "F"-type connectors
- DC power pass from all output ports to the input port (diode protection)

## OTHERS 22 kHz Tone Blocking Filter

9613

- small housing
- low insertion loss

9613

|                 |     |              |
|-----------------|-----|--------------|
| Frequency range | MHz | 950-2150     |
| Insertion loss  | dB  | 1            |
| DC loss         | V   | 0,5 typ.     |
| Dimensions      | mm  | 77 x 22 x 17 |

## OTHERS DC Block - DC Inserter

9602

- block DC voltage to receiver
- pass DC voltage to LNB

9602

|                 |     |              |
|-----------------|-----|--------------|
| Frequency range | MHz | 40-2150      |
| Insertion loss  | dB  | 1            |
| DC power pass   | mA  | 500 max.     |
| Dimensions      | mm  | 61 x 51 x 16 |

# Distribution Accessories

## OTHERS DC Block

- block DC voltage from input to output

**9631**

|                 |            |              |
|-----------------|------------|--------------|
| Frequency range | <b>MHz</b> | 5-2300       |
| Attenuation     | <b>dB</b>  | 1            |
| Dimensions      | <b>mm</b>  | 72 x 22 x 17 |

## OTHERS F-F Galvanic Isolator

- high galvanic isolation of both center and shield
- small design

**9620**

|                    |            |                      |
|--------------------|------------|----------------------|
| Frequency range    | <b>MHz</b> | 5-2150               |
| Galvanic isolation | <b>VDC</b> | 400-800              |
| Capacitor value    | <b>nF</b>  | center: 1 / shield:4 |
| Dimensions         | <b>mm</b>  | 51 x 14 x 14         |

## OTHERS Priority Switch

- priority switching
- signaling bypass to LNB

**9337**

|                         |            |   |
|-------------------------|------------|---|
| Frequency range:        | <b>MHz</b> | 950 - 2150  |
| Insertion loss          | <b>dB</b>  | < 3,5   |
| Isolation               | <b>dB</b>  | > 15  |
| Signaling bypass to LNB | -          | 22 KHz tone and 13/18V power                      |
| Switch control          | -          | Priority receiver gets priority (if voltage >10V) |
| DC loss                 | <b>V</b>   | 1.0 max.  |
| Dimensions              | <b>mm</b>  | 61 x 51 x 16                                      |

| 4524 | 2 way tap | 5-2300 MHz, 30 dB |
| 4540 | 4 way tap | 5-2300 MHz, 12 dB |
| 4541 | 4 way tap | 5-2300 MHz, 15 dB |
| 4542 | 4 way tap | 5-2300 MHz, 20 dB |
| 4543 | 4 way tap | 5-2300 MHz, 25 dB |
| 4544 | 4 way tap | 5-2300 MHz, 30 dB |
| 4561 | 6 way tap | 5-2300 MHz, 15 dB |
| 4562 | 6 way tap | 5-2300 MHz, 20 dB |
| 4563 | 6 way tap | 5-2300 MHz, 25 dB |
| 4581 | 8 way tap | 5-2300 MHz, 15 dB |
| 4582 | 8 way tap | 5-2300 MHz, 20 dB |
| 4583 | 8 way tap | 5-2300 MHz, 25 dB |

### FILTER

|       |                              |
|-------|------------------------------|
| 6020  | Rejection Filter 425/433 MHz |
| 6006F | Tatoo Filter 466 MHz         |

### COMBINER

|      |                                |  |
|------|--------------------------------|--|
| 1282 | 2 inputs Combiner              | Bd. I-HV DC : bd. V DC   |
| 9507 | SAT/TV Combiner high isolation | VHF-UHF DC/ Satellite DC, high isolation Recommended for universal LNB |
| 9509 | SAT/TV Combiner high isolation | VHF+UHF / Satellite DC combiner, high isolation                        |

## DiSEqC SWITCH

|       |                                  |   |
|-------|----------------------------------|---|
| 9208E | DiSEqC Switch                    | 2 inputs / 1 output                       |
| 9209  | DiSEqC Switch + Terrestrial      | 2 inputs + 1 terrestrial input / 1 output |
| 9209E | DiSEqC Switch                    | 2 inputs + 1 terrestrial input / 1 output |
| 9210E | DiSEqC Switch                    | 4 inputs / 1 output                       |
| 9213  | DiSEqC Switch + Terrestrial      | 3 inputs + 1 terrestrial input / 1 output |
| 9214  | DiSEqC Switch + Terrestrial      | 4 inputs + 1 terrestrial input / 1 output |
| 9215  | DiSEqC Switch + Terrestrial      | 3 inputs / 1 output                       |
| 9218  | DiSEqC Option Switch             | 2 inputs / 1 output                       |
| 9219  | Singel User DiSEqC Option Switch | 2 inputs / 1 output                       |
| 9222  | DiSEqC 2.0 Switch                | 2 inputs / 1 output                       |
| 9223  | DiSEqC 2.0 Switch                | 3 inputs / 1 output                       |
| 9224  | DiSEqC 2.0 Switch                | 4 inputs / 1 output                       |

## OTHERS

|       |                                |                            |
|-------|--------------------------------|----------------------------|
| 6050E | VHF-UHF Attenuator, adjustable |                            |
| 9412  | 22 kHz / 12 V Generator        |                            |
| 9614  | Lightning Protection Filter    |                            |
| 9614E | Lightning Protection Filter    |                            |
| 9615  | Voltage Regulator              | input: 13/18V, output: 12V |
